

Computational challenge

- Download a paper from wiki: «CG VERSUS MINRES: AN EMPIRICAL COMPARISON»
- Implement CG such that a) it can work b) it can handle sparse matrices efficiently
- Download one of the matrices used to produce Figure 4.4 and find out whether error norms decrease in the same way as promised
- Implement MINRES such that a) it can work b) it can handle sparse matrices efficiently
- Fulfill Figure 4.4 with error plots for MINRES.
- Sparse Matrix Collection: <https://sparse.tamu.edu/>
