

UNIVERSITY OF CAPE TOWN - DEPARTMENT OF STATISTICAL SCIENCES
STA2020S
COURSE OUTLINE 2026

1. OVERVIEW

This course outline has been updated to accommodate the fact that we are in full, daily face-to-face teaching on this course this semester.

2. COURSE OBJECTIVES, SYLLABUS & RESOURCES

2.1. COURSE OBJECTIVES

This course is designed to extend your knowledge acquired in STA1000F/S/P/L. The emphasis is on applying statistical methods and modelling techniques to data rather than focusing on the mathematical rigour underpinning these methods. Topics covered include analysis of variance and experimental design, revision, and extension of simple linear regression; multiple regression; logistic regression; model building; time series analysis; and non-parametric statistics. Upon completing this course, students should:

- Understand the theory underlying each of the techniques covered
- Be able to conduct each technique in RStudio
- Interpret statistical output generated from performing the techniques
- Make informed decisions based on the interpretation of statistical output

All data analysis will be performed using the R programming language in the RStudio software. Students will be expected to understand basic R code, **execute simple R commands**, and **interpret RStudio output**.

2.2. COURSE SYLLABUS & SCHEDULE

The syllabus consists of 4 major modules (Regression, ANOVA, Non-parametric tests, and Time Series), each divided into a few weekly units:

MODULE	WEEK	TOPICS	Assessment
Regression	1 (27 to 31 July)	Simple linear regression Multiple regression	
	2 (3 to 7 August)	Multiple regression	
	3 (11 to 14 August)	Multiple regression Model building Logistic regression	
	4 (17 to 21 August)	Experimental Design/Completely Randomised Design (CRD)	COMPULSORY Class Test 1: 17 August All content on Regression (coding in R

ANOVA			included for the content of Week 1 and Week 2)
	5 (24 to 28 August)	CRD & Randomised Complete Block Designs (RCBD)	
	6 (31 Aug to 4 Sept)	Factorial Experiments	
VACATION WEEK			
Non-parametric tests	7 (14 to 18 Sept)	Introduction to non-parametric tests Wilcoxon Signed-Rank Sum test Mann-Whitney U test Kruskal-Wallis test	
	8 (21 to 25 Sept)	Friedman test Spearman rank correlation test	
Time series		Time series introduction Moving average smoothing	
	9 (28 Sept to 2 Oct)	Classical decomposition method Forecaster's toolbox	COMPULSORY Class Test 2: 28 September All content on ANOVA and first week of NP (coding in R included for the content of Week 4, 5, 6 and 7)
	10 (5 to 9 Oct)	Exponential smoothing - trend Exponential smoothing - seasonality ACF & PACF	
	11 (12 to 16 Oct)	ARIMA modelling	
	12 (19 to 23 Oct)	ARIMA modelling	COMPULSORY Class Test 3: 22 October All content on Non-parametric tests and Time Series content

			up to the end of exponential smoothing (coding in R included for the content of Week 7 to 10)
	13 (26 to 27 Oct)	Revision	SPECIAL Class Test 4: 27 October All course content and coding in R for Weeks 1 to 12.
	28 Oct to 4 Nov	Consolidation	
EXAM			

These modules are available to you on Amathuba under the 'Content' tab. Note that the weekly units are only released at 17:00 on the Friday of the previous week, so they will not all be immediately visible to you. Within each week's unit, you will engage with the course material by:

- Attending daily face-to-face lectures (**see BONUS marks section 7.2 of Class Record**)
- Reading lecture slides, chapters from online textbook(s), course notes & relevant online blogs etc.
- Watching videos (lecture recordings or short online videos if provided).
- Attempting tutorial questions and online practice quizzes.
- Attending and completing a weekly **compulsory** RStudio lab in your selected slot.

2.3. COURSE RESOURCES

There are multiple resources available to facilitate your engagement with this course. Some of these are listed here, in order of priority of use. **Please note that there is NO prescribed/recommended textbook for this course, and there are no official notes for the entire course.** Where appropriate, lecture slides, notes and other materials are provided.

2.3.1 LECTURES & LECTURE MATERIALS.

Lectures are given in the 7th period, Monday to Thursday at the following venues:

7th period

15:00 – 15:50

JD LT 1

Please note that, due to venue shortages at the University, these venues may change during the first few weeks of the semester. Please consult the course announcements on Amathuba for any changes. Note also that all lectures will continue as scheduled during power failures. Where lecture slides and notes are provided, these and the lectures/lecture recordings are the primary material with which you should engage. However, these should not be the sole resources you use.

2.3.2 CONTINUITY OF TEACHING.

If lectures are disrupted and/or access to campus is restricted, teaching and learning will continue online, with live online lectures via Microsoft Teams. All lectures will be recorded. The course convenor will make announcements about changes to the mode or timing of any activities associated with the course (lectures, practicals, tuts, tests, etc.). Students without home Internet access should note Eduroam locations (<https://eduroam.ac.za/>) and other places with free Wi-Fi.

2.3.3 WEEKLY QUIZZES.

There will be an online quiz (or two) released each week to help you practice your understanding. These quizzes do not count towards your class mark. They are optional but **highly recommended** as the Class Tests will be similar to these. You can attempt these as many times as you want.

2.3.4 WEEKLY TUTORIALS.

There will be a set of questions released each week that will serve a good practice of your understanding. A memorandum for each week's tutorial will be released at 17:00 on the Friday of that week. **There are NO tutorial hand-ins and tutorials are NOT compulsory.**

2.3.5 FREE ONLINE RESOURCES.

From time to time, links to free online resources (notes, examples, online textbooks, questions, etc.) will be included in the appropriate place in the Content tab on Amathuba. These are optional resources intended to further develop your understanding of the material. It is recommended that you take the time to engage with them.

2.3.6 RSTUDIO RESOURCES.

You will be provided with ample resources on everything you need to know about and to perform in R and RStudio. These will come in the form of online links, set-up guides, 'pictorials' and a sheet that details all the functions you will need to perform analyses of data for weekly quizzes and the RStudio practical test. You will be allowed to access this sheet during all assessments.

2.3.7 R LAB SESSIONS:

From week 2 onwards, there will be a **COMPULSORY** weekly RStudio lab where you will have the opportunity to engage with tutors regarding the techniques learnt in the previous week in R with a focus on the R code and interpreting the output. To get the best out of these sessions, attempt the labs before your lab session and come prepared with questions.

You will need to sign up for your weekly RStudio lab slot on Amathuba during the first week of the semester.

YOU ARE ONLY ALLOWED TO SIGN UP FOR ONE SESSION, I.E., A DAY AND TIME THAT YOU KNOW YOU CAN ATTEND EACH WEEK OF THE SEMESTER.

If there is a need to change your lab session in a particular week, you must inform the head tutor VIA the google form on the Amathuba site (under R Lab Sessions) AT LEAST 24 HOURS IN ADVANCE. Otherwise, you will not be able to access the quiz, and you will not receive attendance for that week's lab (which is a DP requirement).

The labs will consist of you doing things in RStudio and answering a few questions on Amathuba. It can only be taken from a lab PC. It will be a DP requirement that you complete all of these labs. **These labs will not count towards your Class Record, but they are compulsory for DP.**

YOU CAN MISS AT MOST TWO LABS FOR A VALID MEDICAL REASON OR OTHER URGENT PERSONAL MATTERS. YOU DO NOT HAVE TO SUBMIT A MEDICAL NOTE TO THE COURSE ADMINISTRATOR OR HEAD TUTOR, BUT WE WILL KEEP A RECORD OF YOUR ATTENDANCE.

3. COURSE MANAGEMENT

Course convenor:	Ms. Ané Cloete (ANOVA and Non-parametric tests) Office: Room 5.67, P.D. Hahn Building, level 5 (South entrance) E-mail: ane.cloete@uct.ac.za
Other lecturers:	Mrs. Delene van Wyk-de Ridder (Regression) Office: Room 5.41, P.D. Hahn Building, level 5 (South entrance) E-mail: delene.vanwyk@uct.ac.za Dr Allan Clark (Time Series) Office: Room 5.50, P.D. Hahn Building, level 5 (South entrance) E-mail: allan.clark@uct.ac.za
Course administrator:	Ms. Tandiswa Ntshongwana E-mail: tandiswa.ntshongwana@uct.ac.za
Head tutor:	Undjee Kanguuehi E-mail: KNGUND001@myuct.ac.za

Please consult the 'GETTING ASSISTANCE' section below for information on how you can get help. Should your query need to be answered by e-mail, please follow the guidelines in that section as to whom you should address the e-mail. **Please ensure that all correspondence with the department contains your student number.**

4. COURSE GRADE

4.1. DP REQUIREMENTS

4.1.1. A minimum of 35% for the Class Record. This will be strictly enforced, i.e., obtaining less than 35% for the Class Record will result in a DP refusal (DPR). You may appeal the DPR decision, but this has to take place **within three working days** of the publication of the DP refusal list. Note that completion of the **RStudio labs attendance will be considered when reviewing DP appeals.**

4.1.2. Completion of weekly in-person RStudio labs. You **MUST** attend and complete every weekly in-person RStudio lab. These are compulsory and must be taken. You can miss at most **TWO** RStudio labs without submitting a medical certificate.

You must attend all the weekly RStudio lab sessions and complete the lab quiz as proof of your attendance. There will not be any make-up RStudio labs - if you fail to attend all your weekly RStudio lab sessions, you will not get DP for this course. Those students who miss more than two RStudio labs will have to take an additional practical test in the last week of teaching and obtain at least 35% for that practical test to fulfil the weekly quiz test DP requirement. Those students who miss two or more RStudio labs without a valid medical reason will not get DP for this course.

4.1.3 Completion of in-person lab-based Class Tests. Class Tests 1,2, and 3 are **compulsory**. You can miss at most ONE class test for a valid reason. All valid reasons for absence must comply with UCT rules and regulations (medical, UCT or provincial or national sport-related, or approved personal reasons). A class test missed without a valid reason will be awarded 0. If you miss more than one compulsory Class Test, you will not be eligible to write the make-up Class Test 4 and will receive a DPR.

The following scenarios regarding Class Test 4 are for your consideration:

- Class Tests 1, 2, and 3 are compulsory.
- Class Test 4 may only be written under the very specific circumstances outlined below.

1. You meet the R lab attendance criteria but missed one compulsory Class Test (1, 2, or 3)

- If you have attended the required number of R labs but missed exactly one of Class Tests 1-3 for a valid reason, you must write Class Test 4.
- Class Test 4 will replace the missed test.
- Your final Class Record will be calculated using:
 - The two compulsory Class Tests you wrote, and
 - Class Test 4
- Important: If your final Class Record (after including your mark for Class Test 4) is below 35%, you will receive a DPR, and no further opportunity to obtain exam entrance will be granted.

2. You missed more than two R Labs, but all compulsory Class Tests (1-3) were written

- If you:
 - Miss more than two R Labs, and
 - Have written Class Tests 1, 2, and 3, and
 - Obtain a final Class Record above 35%
- You must write Class Test 4.
- You must obtain at least 40% for Class Test 4.
- Important: If you meet this requirement
 - You receive a DP mark and gain entrance to the exam.
 - Your final Class Record remains unchanged and is based only on Class Tests 1-3.

3. You missed more than two R Labs, and missed one compulsory Class Test (1, 2, or 3)

- If you:
 - Miss more than two R Labs, and
 - Have written only two of Class Tests 1-3 (for valid reasons)
- You must write Class Test 4.
- You must obtain at least 40% for Class Test 4.
- Your final Class Record will be calculated using:
 - The two compulsory Class Tests you wrote, and
 - Class Test 4
- Important: If your final Class Record (after including your mark for Class Test 4) is below 35%, you will receive a DPR, and no further opportunity to obtain exam entrance will be granted.

4. You missed more than two R Labs, and have written all compulsory Class Tests (1, 2, and 3), but you received a final class mark between 30 and 35%

- If you:
 - Miss more than two R Labs, and
 - Have written Class Tests 1, 2, and 3, and
 - Obtain a final Class Record between 30 and 35%
- You must write Class Test 4.
- You must obtain at least 50% for Class Test 4.
- Important: If you meet this requirement
 - You receive a DP mark and gain entrance to the exam.
 - Your final Class Record remains unchanged.

5. You meet the R lab attendance criteria and have written all compulsory Class Tests (1, 2, and 3), but received a DPR due to a Class Record between 30 and 35%

- If you:
 - Have written Class Tests 1, 2, and 3, and
 - You attended the required number of R labs, and
 - You obtained a final Class Record between 30 and 35%
- You are allowed to write Class Test 4.
- You must obtain at least 50% for Class Test 4.
- Important: If you meet this requirement
 - You receive a DP mark and gain entrance to the exam.
 - Your final Class Record remains unchanged.

4.1.3. Attendance of at least 70% of lectures. This will be calculated over the entire semester based on the total number of lectures. That is, you must attend at least 70% of all lectures during the semester to meet the attendance requirement.

4.2. BONUS MARKS FOR LECTURE ATTENDANCE.

You can achieve up to 5% extra on your Class Record by attending lectures and doing well on the lecture attendance quizzes! We strongly believe that lecture attendance is highly positively correlated with class test performance (and by extension, overall performance) in this course.

Your lecture attendance will be recorded by successfully completing a short quiz during your lecture, Monday to Thursday each week, starting in Week 2. The bonus marks will be awarded as follows:

Achievement:	# bonus marks
Average of 70% lecture attendance across all weeks of the semester, AND obtain an average of 60% across the attendance quizzes	1 bonus mark
Average of 70% lecture attendance across all weeks of the semester, AND obtain an average of 70% across the attendance quizzes	2 bonus marks
Average of 80% lecture attendance across all weeks of the semester, AND obtain an average of 80% across the attendance quizzes	3 bonus marks
Average of 90% lecture attendance across all weeks of the semester, AND obtain an average of 80% across the attendance quizzes	4 bonus marks
Average of 90% lecture attendance across all weeks of the semester, AND obtain an average of 90% across the attendance quizzes	5 bonus marks

NOTE: The maximum Class Record you can achieve is 100%, inclusive of bonus marks. To be awarded these bonus marks, you will need to have a device (cell phone/laptop/tablet) with you in lectures, with the Microsoft Authenticator app installed, on which you can connect to WiFi and access Amathuba.

If you attend a lecture, but you are unable to use your device to capture your attendance electronically, please raise your hand while seated so that the lecturer can count the number of hands at that precise moment in time.

After the lecture, please report to the lecturer at the podium so they can capture your details for manual entry in the attendance register. **YOU WILL BE REQUIRED TO SHOW YOUR STUDENT CARD AS WELL AS A SCREENSHOT/PROOF THAT YOU COULD NOT ACCESS THE QUIZ.**

If you raise your hand, but forget to hand in your details, you will not be awarded attendance if you remember afterwards. Students who consistently fail to complete quizzes in class will be investigated.

The Department reserves the right to suspend or cancel the bonus mark system if there is reasonable evidence of academic dishonesty related to it, pending the outcome of UCT's academic integrity procedures.

4.3. FINAL MARK. Your final course mark will be calculated as: $40\% \times \text{Class Record} + 60\% \times \text{Exam mark}$:

$$0.4 \times \{33.33\% \times \text{Class Test 1} + 33.33\% \times \text{Class Test 2} + 33.33\% \times \text{Class Test 3} + \text{Bonus Marks}\} + 0.6 \times \{\text{Exam mark}\}$$

If ONE class test is missed (with a valid medical certificate or other valid reason), the student will be required to write Class Test 4, which will replace the contribution of the missed class test in kind, and the mark will be calculated as stipulated above, and as specified in section 4.1.3, e.g.,

$$0.4 \times \{33.33\% \times \text{Class Test 1} + 33.33\% \times \text{Class Test 2} + 33.33\% \times \text{Class Test 4} + \text{Bonus Marks}\} + 0.6 \times \{\text{Exam mark}\}$$

If more than one class test is missed, the student will not be granted DP, as highlighted in section 4.1.3.

In cases where students are admitted to a Deferred Exam, the marks will be calculated as with the usual final course mark as stipulated above. Obtaining a final course mark below 50% will result in a Fail.

In cases where students are admitted to a Supplementary Exam, the mark obtained in the Supplementary Exam will be the only mark considered and will take the place of the final mark, **not** considering the class record. Students must obtain 50% in the Supplementary Exam to pass the module.

4.4. ENQUIRIES. Provisional DPs and Class Records will be released on the final day of teaching. Please do not inquire about results in person or by telephone; every call delays the processing of the results.

4.5. DEPARTMENT POLICY ON AWARDING SUPPLEMENTARY EXAMINATIONS. We will recommend a supplementary examination for students who obtain a FINAL MARK between 45% and 49%. Further information regarding supplementary exams will be released on Amathuba when the final course grades are released.

5. REGULATIONS

5.1. REGISTRATION.

It is your responsibility to ensure you meet the course prerequisites; if so, that you are officially registered for the course. You can check if you are registered via *PeopleSoft* on the UCT website, or by inquiring at your Faculty office. **If you do not meet the prerequisites, you are responsible for deregistering from the course.**

5.2. NOTICES.

An announcement on the Amathuba site for STA2020F will be considered sufficient to inform all class members of any details or changes concerning the course. Please check the announcements section regularly.

5.3 DEPARTMENTAL POLICY ON MEDICAL CERTIFICATES

STA policy on missing/missed class tests

A Circumstances under which a student may be exempted from a class test

1. For reasons of personal illness

In accordance with University policy, an exemption will be considered where "a student who by reason of illness before, at the time of, or during a test, or a recurring medical complaint, or a history of illness, or a physical disability, or other good cause is unable to take a test." However, to gain such an exemption, an application must be submitted to the course convenor not later than five calendar days after the day of the scheduled test concerned and must be supported by a medical certificate or other documentary evidence.

Note that:

- a. Medical certificates issued to students in absentia will not be accepted, and students are expected to consult with doctors within a 48-hour period following a given test.
- b. Medical certificates may not be issued by a medical practitioner who is a family member, and the submission of a medical certificate grants the Department the right to follow up on the date, time and nature of illness expressed on the medical certificate. The Department reserves the right to reject the medical certificate.
- c. Medical certificates obtained via online or over-the-phone consultations will not be accepted.
- d. Medical certificates where the professional merely records that they were 'informed by' the student (or any other statement of this nature) will not be accepted.
- e. **Original signed medical certificates must be submitted in person at the Statistical Sciences reception.** No soft copies will be accepted, and photocopies of such documentation will not necessarily be sufficient to secure exemption; this ultimately being at the discretion of the course convenor.

2. For reasons of family death

Students may be exempted from a test where they are unable to write by virtue of a death in their immediate family (i.e., grandparents, parents, siblings) or where they are required to attend the funeral of an immediate family member. Wherever possible, such applications should be submitted to the course convenor pre-emptively (i.e., before the test concerned) and certainly not later than five calendar days after the day of the scheduled test.

Applications of this type must be supported by a death certificate, funeral notice or other documentary evidence, with the applicant being required to provide details on their relationship to the deceased. Note that the production of such documentation will not necessarily be sufficient to secure exemption, this ultimately being at the discretion of the course convenor.

3. **For other compassionate reasons**

Applications for exemption may be considered on other compassionate grounds. Wherever possible, such applications should be submitted pre-emptively, and certainly not later than five calendar days after the scheduled test date. Applications should be accompanied by a detailed motivation and, where possible, supporting documentation. Note that the provision of such motivation will not necessarily be sufficient to secure exemption; this ultimately being at the discretion of the course convenor.

4. **Circumstances under which exemption will not be considered**

Applications for exemption based on religious or political objection will not be considered, nor will applications motivated by scheduling clashes, cultural or other commitments. Where a test is scheduled on a religious day which has not been identified as a public holiday in the University calendar, it is the responsibility of affected students to advise the course convenor of this fact at the start of the course so that this can be corrected in a timely manner.

B Academic consequences of missing a class test

1. Where no test script has been submitted, and no exemption has been granted, a mark of zero is awarded for a test.
2. Generally, in the case where an exemption has been granted, the Department does not offer the opportunity to rewrite a test that has been missed (i.e. deferred test). Instead, an imputed mark is awarded for the test, whose value is determined as the average of the marks awarded for the remaining class tests written in that course. Importantly, since the overall weight of the class test contribution to the class record remains unchanged, this has the effect of upweighting the contribution of these other class tests.
3. Subject to DP requirements of specific modules, in the situation where more than half of the class tests in a course have been missed (e.g., two out of two tests, or two out of three tests) no DP certificate will be awarded on the basis that there has been insufficient engagement with the material taught on the course.
4. Deferred tests may be offered, but only in exceptional circumstances and at the discretion of the course convenor.

5.3. UNIVERSITY POLICY ON CHEATING

You commit plagiarism when:

- In any written work you use another person's words, ideas or opinions without acknowledging them as being from that person, or
- Another student gives you permission to use one of his or her past or current assignments and you copy or hand in that work as your own

"If you are found cheating, you will get 0 for the work and will be charged before the University Court. Unless there are unusual circumstances the prosecution will ask for your expulsion. And even if you are not expelled, a conviction for cheating on your academic record is likely to limit your career opportunities. If you are preparing for

a profession, you should know that a conviction for cheating in academic work may bar you from professional licensing temporarily or permanently."

Statement from the University Registrar, Hugh Amoore

UCT Avoiding Plagiarism: A Guide for Students:

https://ebe.uct.ac.za/sites/default/files/media/documents/ebe_uct_ac_za/53/3-avoiding-plagiarism-a-guide-for-students.pdf

ACADEMIC INTEGRITY

Policy for the Prevention and Management of Academic Misconduct by Students:

https://uct.ac.za/sites/default/files/media/documents/uct_ac_za/39/Policy_Students_Academic_Misc_onduct_December2023.pdf

ARTIFICIAL INTELLIGENCE

While generative AI can provide useful tools to enhance some aspects of academic work, the University is deeply concerned that inappropriate AI use is undermining student learning and is leading to academic dishonesty. We are following the directive that at least 80% of all graded work should be produced under controlled, in-person conditions to prevent misuse of AI.

The Department of Statistical Sciences takes the position that submitted work should not be produced using any generative AI tools - *including the use of AI to identify readings, summarise readings, generate essay structure, and to write or edit text* - except with the express written permission of the course lecturer that clearly delineates acceptable and appropriate as per their specific course and assignments. Your task as a student is to learn and develop these core academic skills independent of AI.

UCT Student Guide: Using ChatGPT and other AI tools in education:

<https://docs.google.com/document/d/1llgONbM6qc5eklUjUnvsFabw3NL5sgSFKnXKGUcbVBw/edit?tab=t.0>

6. AMATHUBA

5.1 USE OF AMATHUBA.

All students registered for STA2020F will have access to the STA2020F *Amathuba* course site. Various resources will be available on this site.

5.2 WHAT TO DO IF YOU CANNOT ACCESS AMATHUBA.

If you still do not have access to *Amathuba*, do the following:

- a) First, make sure that you are indeed registered for the course by contacting your Faculty office directly. All students registered for the course will be automatically added to the *Amathuba* site. If you are registered but have not been added to the *Amathuba* site, please consult your Faculty.
- b) If you are not registered for STA2020F, we may not add you to the *Amathuba* site without **written** consent from your Faculty. Therefore, if you are requesting to be added to the site due to registration

delays, please provide **the necessary documentation to the course administrator and convener via email.**

7. GETTING ASSISTANCE

There are two primary avenues for you to get help: the online Discussions Q&A on Amathuba and e-mail. Below is a **strict** outline of the procedure to follow when seeking help.

Amathuba Discussions Q&A: Use the Discussion Q&A tool when seeking help from tutors and lecturers. Please be as specific as possible when posting a question. Use the following guideline:

- Any administrative-related query must be posted in the Discussion under the *ADMIN* topic. If you have a query about the course outline or other general aspects of the course, please ask it under the *COURSE OUTLINE* topic.
- If you have a query about any content of the material, please ask it under the relevant topic (*ANOVA*, *REGRESSION*, *TIME SERIES* or *NON-PARAMETRICS*). Please be as specific as possible when posting a question, e.g. 'How do we interpret the standard error of a regression coefficient?' and NOT 'How do you perform multiple regression?'
- If you have a question about R or RStudio, please post it under the *R & R STUDIO* topic. If you have a question about a Test, please post it under the *TESTS* topic. Please include the test number in your query.
- If you have a question about a Tutorial, please post it under the *TUTORIALS* topic. Please include the Tutorial number and question number in your query.
- If you have a question about a quiz test result, please post it under the *WEEKLY QUIZ TESTS* topic. Please include the quiz test number in your question. It should be obvious that you should not ask questions about quiz tests that are still due, only about quiz tests that have already passed.

The Discussion tool will be checked each day. We will endeavour to answer any question posted on the Discussion tool within 24 hours.

E-mail: If your question has not been satisfactorily answered either by a peer in the chat room or the Discussions tool, please follow the following guideline for who to e-mail to get help:

- **Any related administrative query:** tandiswa.ntsahongwana@uct.ac.za
- Any other query related to:
 - ANOVA & Non-parametric tests: ane.cloete@uct.ac.za
 - Time Series: allan.clark@uct.ac.za
 - Regression: delene.vanwyk@uct.ac.za
 - RStudio labs: KNgUND001@myuct.ac.za
 - Any other query that does not fall into one of the above categories: ane.cloete@uct.ac.za

Note that lecturers will not respond to emailed queries that have not, but could have been, posted on the Discussion tool. The Discussion tool is the first line of defence!

Lecturer consultations: Your lecturer will be available for student queries at certain consultation times each week. These hours will be made available on *Amathuba*, via the 'Meet the course team' page under *Course orientation*. Please consult your lecturers during the specified times, or, if they are not suitable, make an appointment with them via email. Lecturer consultation hours only hold during the weeks that they are teaching. Please arrange with the lecturer via email if you need to see them outside of normal consultation hours. Short queries can be dealt with immediately after lectures. Other

difficulties can be referred to the tutorials or hotseats. For administrative issues, contact the course administrator or the Head tutor, as appropriate.

6 ASSESSMENT

6.1 IN-PERSON TESTS

Tests will generally be 2 hours long and will be out of 40 marks.

Class test 1 COMPULSORY		Class Test 2 COMPULSORY		Class Test 3 COMPULSORY		Class Test 4 SPECIAL (see section 4.1.3)	
Date:	17 August (Time TBC)	Date:	28 September (Time TBC)	Date:	22 October (Time TBC)	Date:	27 October (Time TBC)
Venue:	Alumni labs, Scilab D	Venue:	Alumni labs, Scilab D	Venue:	Alumni labs, Scilab D	Venue:	TBD
Type:	In-person computer assessment.	Type:	In-person computer assessment.	Type:	In-person computer assessment.	Type:	In-person computer assessment.
ALL of Regression, including RStudio content from Weeks 1 and 2		ALL of ANOVA and first week of NP, including RStudio content from Weeks 4 to 7		ALL of Non-parametric tests and Time Series up to and including exponential smoothing, as well as RStudio content from Weeks 7 to 10		ALL content, from Week 1 to Week 13, including ALL RStudio content	

Please bring your student card, calculator, pen, and ruler to each in-person assessment.

6.2 FORMULA SHEET AND STATISTICAL TABLES.

A formula sheet is available on *Amathuba*, and the relevant formulae from this sheet will be provided for each online assessment. All necessary statistical tables will be supplied for each assessment.

6.3 IDENTITY.

Bring your student card to all tests and exams. For every online assessment, you will be required to accept the student honour pledge. This pledge is serious, and we will rely on your integrity and honesty to confirm that you, and you alone, are taking the assessment. Please familiarise yourself with the student honour pledge under resources on the *Amathuba* site. You will need to indicate that you will adhere to this pledge for all online assessments. We also reserve the right to include a few questions in an assessment that will assist us in confirming that it is you taking the assessment.

6.4 EXTRA TIME/SECLUDED VENUE STUDENTS.

Please ensure that you email proof of your extra-time concession to the course administrator **within the first two weeks of the semester.**

6.6 ABSENCE. All assessments - weekly RStudio labs and in-person Class Tests 1, 2 and 3, are COMPULSORY.

If you are unable to take an assessment on medical grounds (including mental health), you must obtain a **valid medical certificate** from a doctor (not including RStudio labs). Failure to do this will mean that you will be considered 'absent' and given **zero** for the assessment. **A hard-copy medical certificate must be submitted, in-person, to the course administrator at STA reception on Level 5 of the PD HAHN Building, within three working days of the assessment.** A genuine medical certificate will be accepted for at most one of the in-person class test.

Please note that we do not accept "As I was Informed" medical certificates (including medical certificates from remote / telephonic appointments).

6.7 MARKING & MARKING QUERIES.

In-person assessments:

The marks from the in-person lab-based class tests will be posted on Amathuba approximately two weeks after the test. If you have a query on a class test mark, please **email your DETAILED query** to the Head tutor and course convener. Note that marking queries will only be considered **within five working days** of the publication of results.

6.8 EXAM.

There will be a 3hr in-person lab-based examination at the end of the course. **Please note that it is departmental policy not to provide any exam solutions, so these will not be uploaded onto Amathuba.**

SUB-MINIMUM. There is a 40% sub-minimum mark required on the exam for you to pass this course.

For all tests and the exam, please bring your student card, calculator, pen, and ruler.
