

MOL3100-2026

Introduction to Molecular Medicine with Project

15 credits, compulsory

Course coordinator:

Bodil Kavli

Professor

Department of Clinical and Molecular
Medicine (IKOM)

Molecular Medicine - Interdisciplinary life science research

..... dedicated to understand normal and pathological cellular processes at the molecular level.

- ➡ better and more precise diagnostics
- ➡ new and targeted therapeutic strategies to treat (or prevent) disease

Molecular Medicine - from basic research to the clinic

Molecular Medicine - Lectures - main topics

MOL3100 – Introduction to Molecular Medicine with Project

Learning methods and activities:

- 25 hours lectures (different lecturers/professors)
- 3 hours course, PubMed (learn how to search for literature)
- 3 hours course, EndNote (software, organize references)
- Oral presentation of articles (mandatory activity)
- 6 hours team-based learning (TBL)-prepare for exam
- Mandatory written project (review), 7.5 credit, 50%
- Exam (same as MOL3000), 7.5 credit, 50% (30. Nov 15-19.00)

Bodil Kavli

Katja Scheffler

Magnar Bjørås

Pål Sætrom

Jan Egil Afset

Marit Otterlei

Duan Chen

Morten Rye

Time Schedule on Canvas!

When? Mon.- Wed. 10.15-12.00 (usually)

Week/Date	Time	Topic	Lecturer	Room
35 Mon 24/8	10.15-12.00	Introduction to Molecular Medicine	Bodil Kavli	LK11
35 Wed 26/8	10.15-12.00	The human genome and epigenetics	Bodil Kavli	KBA
36 Mon 31/8	10.15-12.00	It's all about U Info paper presentations and projects	Bodil Kavli	NA
36 Wed 2/9	10.15-12.00	Mutations and polymorphisms- Basis for genetic diversity	Bodil Kavli	HS 03-066
37 Mon 7/9	10.15-12.00	Inherited diseases - examples of monogenic and polygenic diseases	Katja Scheffler	ØHA11
37 Wed 9/9	10.15-12.00	Molecular aspects of cardiovascular and brain-related disorders		KBA
38 Mon 14/9	10.15-12.00	Infectious diseases-diagnosis and treatment	Jan Egil Afset	LK11
38 Wed 16/9	9.00-12.00	PubMed*	Sindre A. Pedersen	KS21
39 Mon 21/9	10.15-12.00	Stem cells and organoids		ØHA11
39 Wed 23/9	10.15-12.00	Non-coding RNA in human health and disease	Pål Sætrom	LK11
40 Mon 28/9	10.15-12.00	Molecular oncology I	Marit Otterlei	KBA
40 Wed 30/9	10.15-12.00	Molecular oncology II	Marit Otterlei	LK11
41 Mon 5/10	9.00-12.00	EndNote*	Jan Ove Rein Liv Gaustad	KS21
41 Wed 7/10	10.15-13.00	Bioinformatics	Moten Rye	KBA
42 Mon 12/10	10.15-12.00	Molecular aspects of diabetes	Duan Chen	ØHA11
42 Wed 14/10	10.15-12.00	Paper Presentations	Bodil Kavli	MTA
43 Mon 19/10	10.15-12.00	Paper Presentations	Bodil Kavli	ØHA11
43 Wed 21/10	10.15-12.00	Paper Presentations	Bodil Kavli	ØHA11
44 Mon 26/10	10.15-12.00	Paper Presentations	Bodil Kavli	MTA
44 Wed 28/10	10.15-12.00	Paper Presentations	Bodil Kavli	MTA
45 Mon 2/11	10.15-12.00	Paper Presentations	Bodil Kavli	ØHA11
46 Mon 9/11	9.00-12.00	Exam prep/TBL-Summary I	Bodil Kavli	HS 04-025
46 Wed 11/11	9.00-12.00	Exam prep/TBL-Summary II	Bodil Kavli	HS 04-025

Where? Lab (LK11), Kvinne-Barn (KBA), Nevro (NA), Helgasetr (HS03-066 / HS04-025), Kunnskap (KS21), Øya Helsehus (ØHA11), Fred Kavli (MTA)

MOL3100 – Introduction to Molecular Medicine with Project - Textbook

Molecular Medicine: An Introduction, 2nd Edition
