

Tentative lecture plan «BI2014 MOLEKYLÆRBIOLOGI» autumn-2026

General orientation and requirements:

Notice: There might be changes and you should check Canavas regularly.

Contact: Professor Atle M. Bones, Department of Biology (IBI).

Curriculum: 1) Text book (see chapters in lecture plan below):
DP. Clark, NJ Pazdernik, MR McGehee , 2019, 3rd edition AP
2) Lectures
3) Student projects and presentations

Assessments: Student project report plus presentation/oral examination = 40%
Written school exam = 60% Notice early exam in present course!
To pass you need an E or better on BOTH the project and the final exam.

Lectures/guiding: Monday R3 08.15-10.00
Wednesday: R3 14.15-16.00
Friday: R3 14.15-16.00 (not all weeks – project group guiding/work)

Project “guidance and counselling”:

We will use R3 some Fridays 14.15-16.00 for project guiding/presentations etc

Project report: There is a **mandatory report** to make for all participants in a journal review style. This report has to be completed, submitted, presented and passed before you can do the final school exam.
A list of topics for the reports will be provided, where you can select.
Format of the report should follow instructions in the guide provided and should be maximum 10 pages + front page.
Topics will be selected and groups will be organized one of the first days of the course.
The deadline for submission of the reports are final and will not be extended.
Submit the doc-file, a pdf (for production of the compendium) and the ppt file for the presentation.

Lab course Bi2015: Some of you will also be participants at the Mol2015 Laboratory course, which in Sept/October (check dates). **Lab course participants are recommended to complete all or most of project report before start of their 2 weeks at the lab.course!**

Lecturers: AB: Atle Bones, PW: Per Winge, RK: Ralph Kissen, LH: Lars Hagen

Questions etc: **Contact:** atle.m.bones@ntnu.no Realfagbygget Room DU1-125

Lecture plan:

Date	Day	Activity	Chap	Teach
26/8	Wed	General information about the course and project and topics	-	AB
28/8	Fri	Genomes and DNA	4	AB
31/8	Mon	No lecture due to EMBO workshop		
2/9	Wed	No lecture due to EMBO workshop		
7/9	Mon	Orientation and selection of topics for the student project reports	-	AB
		+ Manipulation of nucleic acids	5	AB
9/9	Wed	Polymerase chain reaction	6	AB
14/9	Mon	Cloning genes for synthetic biology	7	RK
16/9	Wed	DNA sequencing + Genomics & Systems biology	8+9	PW
21/9	Mon	Regulation of transcription	11	AB
23/9	Wed	Regulation of transcription in eukaryotes	17	AB
28/9	Mon	Analysis of gene expression	21	AB
30/9	Wed	Genome defense/genome editing	20	AB
5/10	Mon	Proteomics: the global analysis of proteins	15	LH
7/10	Wed	Open		
12/10	Mon	Immunological techniques	Own	AB
14/10	Wed	Immunological techniques	Own	AB
19/10	Mon	Gene modified organisms (GMO)	Own	AB
21/10	Wed	Open		AB
23/10	Thu	Open		AB
26/10	Mon	Submit student project reports before 16.00 (to atle.m.bones@ntnu.no)	-	You
28/10	Wed	Open		AB
30/10	Fri	Mandatory presentations and examination of student projects (X groups)	-	AB
2/11	Mon	Mandatory presentations and examination of student projects (4 groups)	-	AB
4/11	Wed	Mandatory presentations and examination of student projects (4 groups)	-	AB
6/11	Fri	Mandatory presentations and examination of student projects (6 groups)	-	AB
11/11	Wed	Orientation and some instructions for your school exam	-	AB
13/11	Fri	Open if needed	-	AB
16/11	Mon	Open for exam preps	-	AB
18/11	Wed	Open for exam preps	-	AB
21/11	Lør	Final exam (counts 60% of total grade). Check when exam starts!	-	AB

We will likely use Fridays for project guiding, open slots might be used or other lectures move to these slots. Follow instructions given on Canvas for updates!
